linkedin.com/in/charliewoodhead7 | artstation.com/charliewoodhead7

PROFILE

Technically minded First-Class Computer Games Design graduate with a Level 2 Certificate in the Principles of Cyber Security. Transitioning towards IT support and cybersecurity, with experience learning complex software, solving production problems and collaborating across teams. Currently UK-based and planning Melbourne and east-coast Australia; available to discuss suitable entry-level opportunities.

SKILLS & TOOLS

Foundational knowledge: network security, phishing, malware, threat detection, incident response and risk management. Transferable strengths: analytical thinking, attention to detail, client communication, teamwork and managing deadlines.

Windows 10/11, Linux, Wireshark, Nmap, VirtualBox, Microsoft 365 and Teams; Jira, Miro and creative production software.

EXPERIENCE

3D Artist Intern

Bulldog Studios, University of Staffordshire | Aug - Oct 2024

- Delivered digital assets to technical specifications within a professional studio pipeline.
- Troubleshoot production challenges, learned advanced tools and shared progress with the team.
- Used feedback from project reviews to improve output quality.

Barista / Customer Service

Chill Coffee and Aune Valley | 2024 - 2025

- Used point-of-sale systems, handled payments and supported customers under pressure.
- Worked closely with colleagues to keep service running smoothly.

Festival Steward & Teaching Assistant

Volunteer experience

- Helped visitors and communicated clearly in busy events environments.
- Provided structured creative and technical support in a Year 9 media workshop.

EDUCATION & DEVELOPMENT

BSc (Hons) Computer Games Design - First Class Honours

Staffordshire University | 2020 - 2023. TIGA Graduate of the Year 2023 - Artist.

Level 2 Certificate in the Principles of Cyber Security, completed 2026. Previous self-directed CompTIA Security+ (SY0-701) study; not yet certified.

SELECTED TEAM PROJECT

Collaborative Games Development

Staffordshire University | 2022 - 2023

Coordinated across art, design and engineering teams; tracked tasks and milestones using Jira and Miro; produced asset documentation and acted on feedback.
